

» Racemap

GPS Live Tracking
with free Android & iPhone App

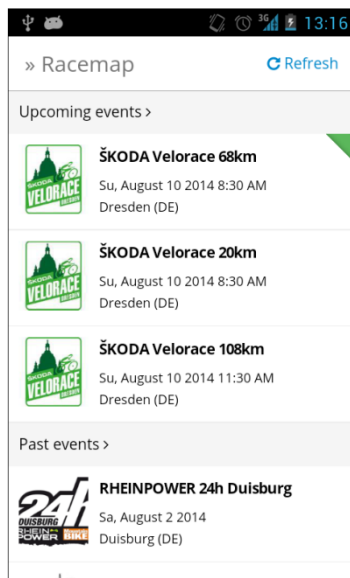

WHY?

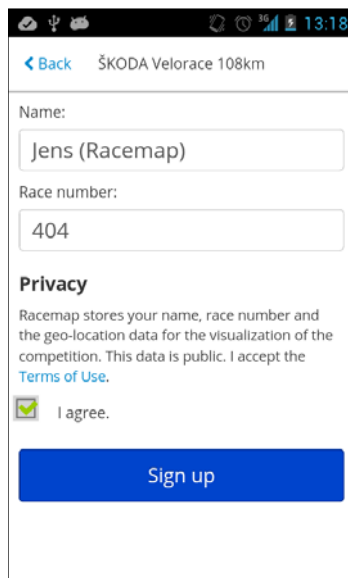

- **Overview - Spectators** keep track of the competition easily
- **Safety - Organizers** overlook the action on the race track
- **Analysis** - As an **Athlete** you can replay and analyse your competition

HOW?

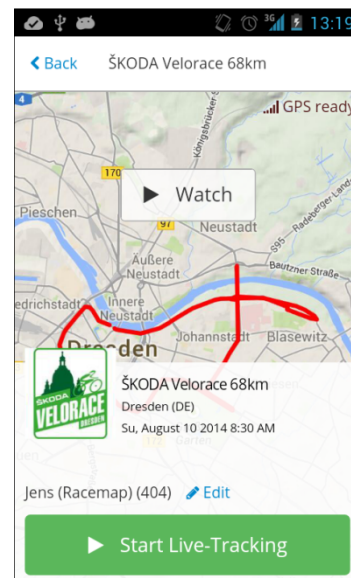

Click "Upcoming events" and select your event

Sign in with your (nick)-name and your race number, no registration

Start Live-Tracking five min. before start and stow smartphone properly

NOTES

Test Live-Tracking before Competition. The Racemap event you are signed in already supports live tracking. Just drop in and test live tracking, so it works well during the competition.

Stable GPS-Connection. Check GPS connection in settings and your flag in the live stream. In idle state the smartphone does not fix GPS.

Stow Smartphone properly. The antenna of your tracking device must be uncovered: at the upper arm, in a tricot pocket, backpack lid pocket.

Battery Life depends on your device, the battery and your usage behavior.

- Charge your phone
- Restart your phone
- Stop all apps you do not need
- Use an external battery or powerbank for long events

For a better **Use Experience** as spectator of a sports event with many athletes watch the live stream on a computer.
